

Mass Global Solutions launches four E-bike models

Dhaka:: As fuel prices continue to climb and environmental concerns grow, electric bikes (e-bikes) are rapidly becoming a popular mode of transportation in Bangladesh. Reflecting this surge in demand, **Mass Global Solutions Limited** has officially launched its “Pollux” e-bike series, featuring four distinct models designed with advanced Chinese technology and European standards. According to importers, e-bike imports have multiplied in recent years, particularly in the capital. The Pollux series aims to cater to this growing market by offering cost-effective, sustainable, and high-performance alternatives to traditional internal combustion engines. The Pollux Lineup: Four Models for Every Need

1. Pollux ‘Double Star’: The Long-Distance Specialist

Designed for users worried about range anxiety, the Double Star features a **dual-power engine (Electric & Generator)**.

- **Range:** Up to 300 km on a single charge.
- **Performance:** 1,000W motor with a top speed of 85 km/h.
- **Features:** Three power modes, LCD display, anti-theft alarm, and a USB mobile charger.

2. Pollux ‘Lone Star’: The City Commuter

Tailored for busy urban streets, the Lone Star focuses on comfort and aesthetics.

- **Performance:** 1,500W motor with a top speed of 70 km/h.
- **Battery:** Waterproof Lithium battery with a two-year warranty.
- **Features:** Reverse gear for easy parking, portable charging modes, and rain-safe technology.

3. Pollux 'Star 125': The Choice of Gen-Z

Moving away from the traditional scooter look, the Star 125 offers a sporty design reminiscent of the classic CG125.

- **Performance:** Top speed of 110 km/h with a 5-speed gear system.
- **Structure:** 12-liter fuel tank, front disc brakes, and a digital LCD display.
- **Target:** Young riders looking for a blend of speed and style.

4. Pollux 'Tri Star': Stability and Comfort

A three-wheeled e-bike designed for elderly users or commercial delivery services.

- **Performance:** 1,500W motor with a top speed of 70 km/h.
- **Safety:** Full bodyguards, large footrests, and a three-step mode system.
- **Features:** Reverse gear, remote on/off, anti-theft alarm, and a waterproof 60V 28AH Lithium battery.

Efficiency and Sustainability

Major General (Retd.) Masud Rezwana, Chairman of Mass Global Solutions Ltd., emphasized the transparency and reliability of the brand. "We ensure 100% availability of spare parts and servicing, which is a major concern for e-bike users in Bangladesh," he stated.

He further noted the economic benefits:

- **Cost Efficiency:** A full charge costs approximately **Tk 10** and covers nearly **90 km**.
- **Eco-Friendly:** Zero carbon emissions, contributing to a greener urban environment.
- **Certification:** Produced in ISO 9001:2015 certified factories to ensure international quality.

Showroom and Contact Information

Interested customers can visit the company's showroom at **160/27 Baganbari (West of Sumatra Filling Station), Dhaka Cantonment.**

For corporate inquiries, the head office is located at **Level-4, SKS Tower, Mohakhali, Dhaka.**

- **Contact: 01714-465239, 01712-472563.**

As the energy landscape shifts, Mass Global Solutions aims to lead the transition toward a more efficient and technologically advanced commuting culture in Bangladesh.
